

Το νέο GCC i-Craft είναι το ιδανικό κοπτικό 30cm για χομπίστες, scrap-bookers, σχολεία, γραφεία, οικογένειες ή ακόμη και μικρά καταστήματα.

Η ευκολία χρήσης του, το μικρό του μέγεθος, η μεγάλη συλλογή ετοιμών σχεδίων & clipart προς κοπή, η δυνατότητα κοπής εκτυπωμένων θεμάτων (AAS-II), η προσιτή τιμή του, η δυνατότητα να κόβει εκτός από βινύλιο, αυτοκόλλητα, χαρτιά και χαρτόνια έως 0,8mm, δίνουν στον κάτοχό του μεγάλες δυνατότητες ιδίως για το χώρο του scrapbooking, για tattoo, προσωποποιημένες διακοσμήσεις, κατασκευή προσωπικών καρτών & δειγμάτων προσκλητηρίων και άλλες δυνατότητες με μόνο όριο την φαντασία σας!

i-CRAFT™

Το ιδανικό εργαλείο για να μετατρέψετε την δημιουργικότητά σας σε πραγματικότητα

Enhanced AAS II Contour Cutting System

With AAS II contour cutting system, users can print graphics and use i-Craft™ to cut the contour automatically to complete a diversity of designs in an easy way, including stickers, décor, cards and so on.

Adhesive Sheet

Adhesive sheet can be used to fix different materials from card stock to soft magnet. It provides a very common used cutting area, 12 x 12 inches, and a more extensive cutting area, 12 x 24 inches (optional item)

SD Card Slot

With the use of SD card, users can create their designs wherever they want and save it to SD card for later uses. i-Craft™ eliminates the limitation of creation. (Note: SD card is an optional item.)

Rhinestone Application

Thanks to the superior cutting force and standard software function, i-craft™ handles rhinestone stencil cutting with ease, people are amazed with its great versatility.

Auto-adjusted Blade

i-Craft™ is equipped with an auto-adjusted blade, so users can cut the designs perfectly without complicated blade adjustment procedure.

250 Grams of Cutting Force

The maximum of 250g cutting force extends the applicability of a i-Craft™ which can cut various materials, such as cardstock paper, heat transfer paper, tattoo paper and soft magnetic.

Intuitive AP Software and Driver

i-Craft™ standard software is compatible with a diversity of file formats including SVG, PDF, AI, EPS, PLT, PNG, and WPC, providing the optimum compatibility. Better than that, GCC exclusive driver for i-Craft™ allows users to use familiar design software and print to i-Craft™ via driver with ease, extending the compatibility and user friendliness.

Large LCM Screen

The large LCM screen can show the selected function and make it easy to operate. Ease of use user interface turns every user to be a scrapbooking expert.

i-CRAFT™

The best tool to turn your creativity into reality!

- ★ Εώς 30,5cm πλάτος κοπής
- ★ Ταχύτητα 300mm/sec
- ★ Πίεση 250grams

- ★ SD Card
- ★ Αναγνώριση & κοπής εκτυπωμένου θέματος με το AAS II
- ★ Αυτό-ρυθμιζόμενο μαχαιράκι

MODEL	i-Craft™
Operational Method	Roller-Type
Max. Cutting Width	30.5 cm (12")
Max. Cutting Length	up to 1000 mm
Max. Media Loading Width	33 cm (13")
Max. Media Cutting Width	32 cm (12.48")
Number of Pinch Rollers	2
Acceptable Material Thickness	0.8 mm (0.03")
Cutting Force	5~250 g
Max. Cutting Speed	300 mm/sec (12ips)
Over Cut	Yes
Repeat and Copy	Yes
Offset	0~1.0 mm (with an increase of 0.025 mm)
Memory Buffer	32 MB
Interfaces	USB 2.0 (Full Speed), SD card
Mechanical Resolution	0.05 mm
Software Resolution	0.025 mm
Distance Accuracy	±0.254 mm or ±0.1% of move, whichever is greater
Repeatability	±0.1 mm
Control Panel	LCD panel
Power Supply	AC adapter, 24V DC (1.67A)
Power Consumption	max 40 watts
Automatic-Aligning System	Completely Automatic Contour Cutting System for print to cut solution
